

ECI TECHNOLOGY SUPPLY CHAIN SECURITY CORONAVIRUS COVID-19 VIRUS UPDATE

June 2020

Dear Business Partners,

In light of the COVID-19 virus situation, we made a risk assessment and took the necessary measures optimizing support and product delivery for our customers. As an essential business entity ECI Technology was exempt from the mandatory shutdown by the Governor of New Jersey in March. Our R&D, service, manufacturing, warehouse, shipping and receiving departments remained fully operational to enable the best possible support for our customers in these challenging conditions. As New Jersey executes a multi-stage approach to lifting statewide public restrictions our at-home employees will be returning to the office. We have taken the necessary measures to protect the health of our employees:

- All workers will complete a Daily Covid-19 Questionnaire before entering the building
- All workers are required to wear face masks
- All visitors must be approved and screened prior to entering the facility
- Workspaces have been modified to comply with social distancing guidelines recommended by the CDC
- The facility is professionally cleaned day and night

Our management team continues to closely monitor the situation. The most important thing is to make sure we conduct business in a safe environment.

Regards,

Marianna Rabinovitch
CEO
ECI Technology
